HHS4185 Common Rehabilitation Conditions

HHS4185J 復康科常見疾病

Tutorial 導修課

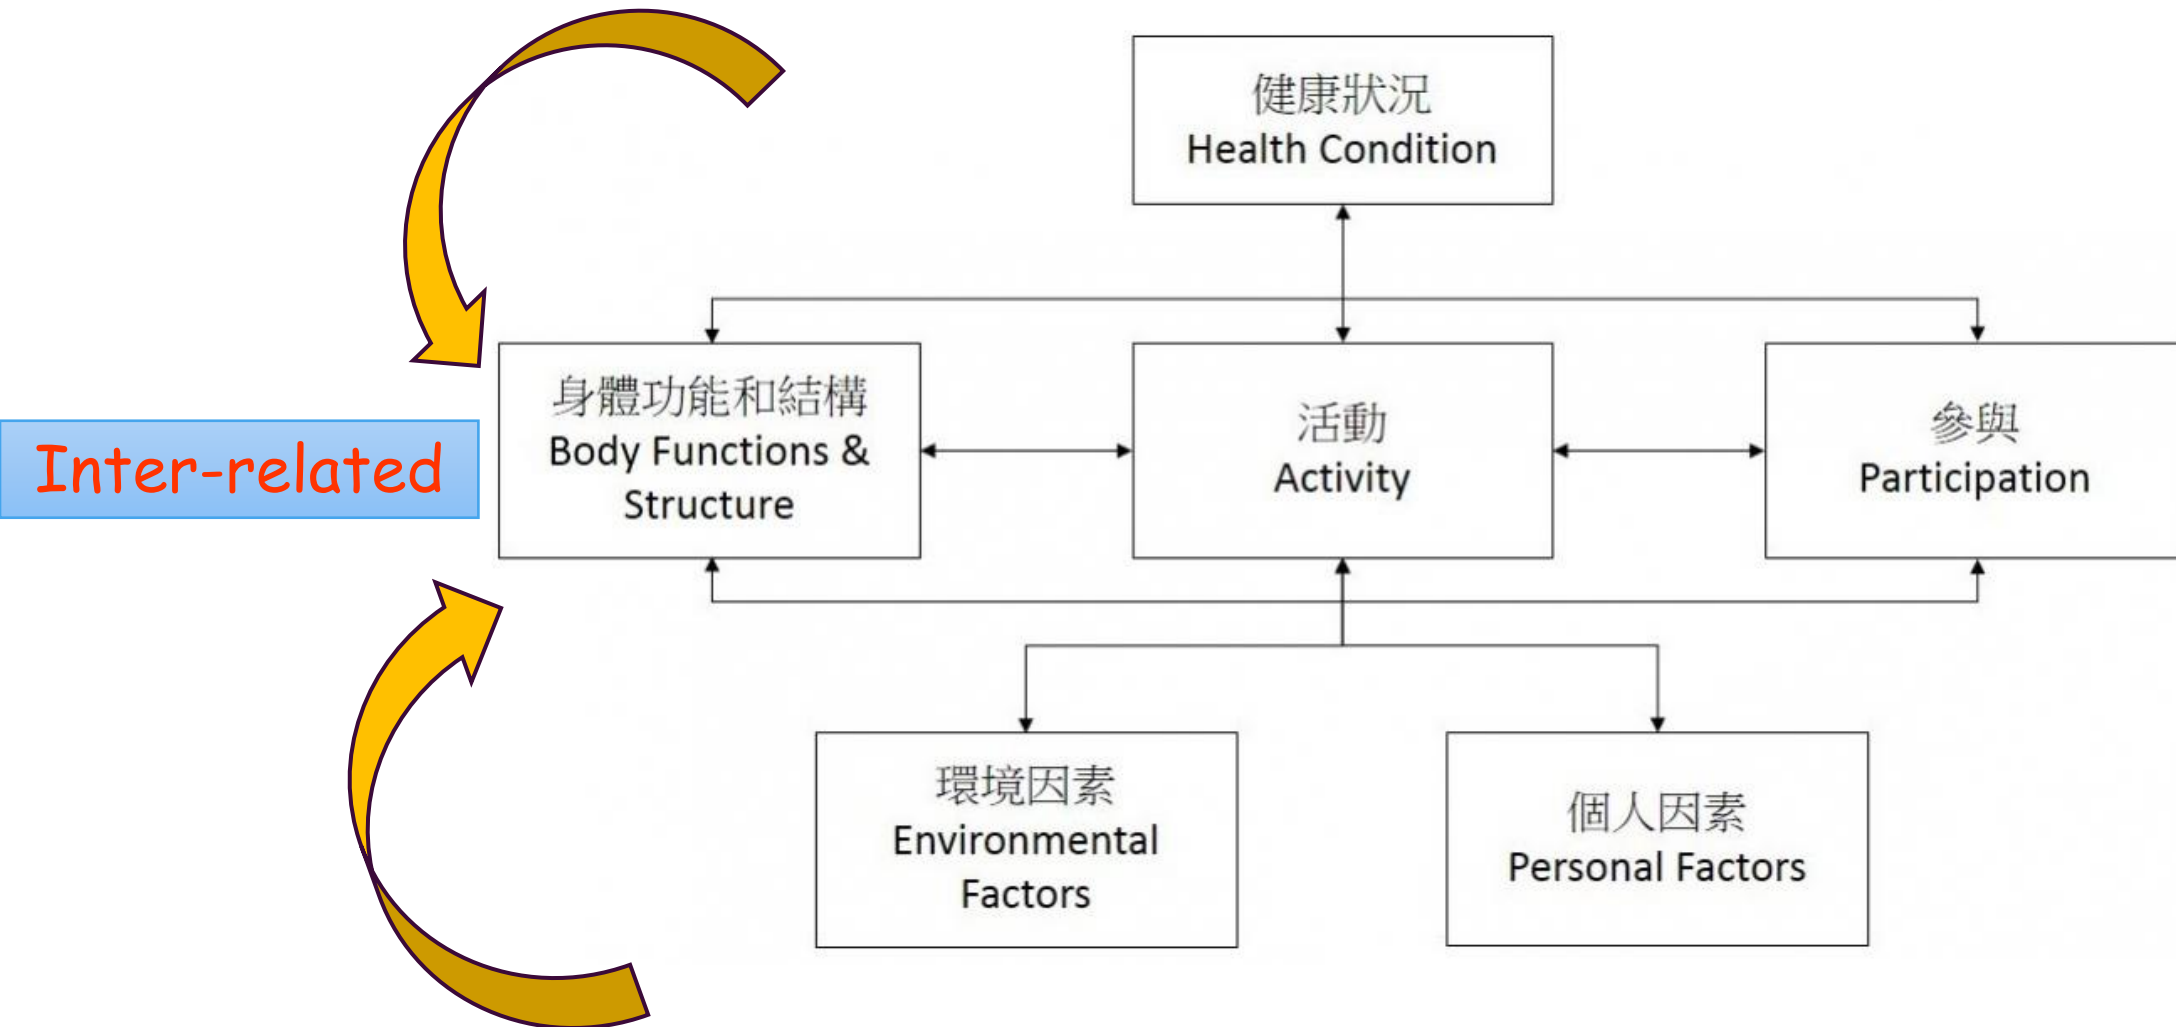

T1

Lecturer: Ms. Fion Yeung (HHS4185)
講師: Ms. Shan Li (HHS4185J)

*Rehabilitation
conceptual framework*
復康治療的概念架構

International Classification of Functioning, Disability and Health (ICF)

國際健康功能與身心障礙分類 (ICF)

(WHO, 2002)

International Classification of Functioning, Disability and Health (ICF)

國際健康功能與身心障礙分類 (ICF)

- provides a standard language for classifying body functions and structures, activities, participation levels & conditions in the world around us that influence health
- classify health & health related domains- assess health, functioning, activities & environmental factors
- framework of the World Health Organization (WHO) for measuring health and disability at both individuals and population levels
- 用於對會影響我們健康的身體功能和結構、活動、參與水平和條件提供了一種標準語言，以便進行分類
- 對健康和健康相關領域進行分類- 評估健康、功能、活動和環境因素
- 世界衛生組織 (WHO) 在個人和人群層面衡量健康和殘疾的框架

Dimensions of ICF

ICF 分類系統維度

- **Health Conditions 健康狀況**
 - Disease: a known or identifiable cause, such as a virus, bacteria, genetic mutation, or other biological malfunction
 - 疾病: 已知的醫學診斷結果(疾病名稱), 例如病毒, 細菌, 基因突變, 或其他生物學不正常
- **Contextual Factors 背景因素**
 - Personal factors: gender, age, coping styles, social background, education, experience, characters...
 - Environmental factors: external physical / social factors (e.g. stairs, slopes, caregiver, employer, etc.
 - 個人因素: 性別, 年齡, 應對策略, 社會背景, 教育, 經驗, 性格...
 - 環境因素: 外在物理性 / 社會性因素 (例 樓梯, 斜路, 照顧者, 顧主, 等)

Dimensions of ICF

ICF 分類系統維度

Body functions: physiological functions of body systems, including psychological functions (e.g. sensory functions, speech functions)

身體功能: 身體各系統的生理功能 (例 感官, 語言)

Body structures: anatomical parts of the body, such as organ & limbs (e.g. eye, ear, nerve, bones, muscles)

身體構造: 身體各系統的解剖構造 (例 眼睛, 耳朵, 神經, 骨骼, 肌肉)

Activities: is the execution of a task or action by an individual (e.g. self care, mobility, communication)

活動: 一個人執行的行動或任務 (例 自理, 行動, 溝通)

Participation: involvement in a life situation (e.g. employment, go to church, social gathering)

參與: 指能在生活的情境中參與活動 (例 就業, 參加教會活動, 社交聚會)

健康狀況 Health Condition

Rheumatoid Arthritis of
Both Hands
雙手類風濕性關節炎

Ulnar drift of hands and wrists
Swelling of hand joints
Pain & morning stiffness
雙手及手腕尺側偏移
手部關節腫脹
痛症及晨僵

Affected employment as clerical worker
Affected social gathering with friends when
dining out
Affected family role to purchase necessary
grocery
影響受僱為文職人員
影響和朋友外出用膳的社交聚會
影響作為家庭成員去購買日常生活用品

身體功能和結構 Body Functions & Structure

活動 Activity

參與 Participation

Difficulty to use keyboard for typing
Difficulty for shopping
Difficulty to use chopstick when eating
使用鍵盤打字有困難
購買日常生活用品有困難
使用筷子吃食時有困難

Acceptance of employer
Ergonomic design keyboards
Adaptive utensils for eating
僱主的接受性
人體工學設計的鍵盤
輔助食具

環境因素 Environmental Factors

個人因素 Personal Factors

Family income
Religion
Experience: mother has
the disease
家庭收入
宗教
個人經驗: 母親患此疾病

Education to Patients & Caregivers

教育患者和照顧者

- Self-management on conditions / chronic diseases
 - e.g. pain management, diabetes
- Reinforce the precautions after surgery / situations
 - e.g. avoid crossed leg & sit on low chair after total hip replacement (THR)
- Transfer & mobility techniques for clients & caregivers
- Fall prevention at home & community
- Proper use of adaptive equipment for functional activities
 - e.g. wheelchair, walking aids, ankle-foot orthosis (AFO)
- Stump management & prosthetic maintenance
- 健康狀況 / 慢性疾病的自我管理
 - 例如疼痛管理、糖尿病
- 提升手術後或健康狀況改變後的預防措施
 - 例如全髖關節置換術 (THR) 後避免盤腿和坐在矮椅上
- 教授病者及照顧者進行轉移及步行等技術
- 家居及社區預防跌倒教育
- 正確使用輔助設備以進行功能活動
 - 例如輪椅、助行器、踝足矯形器 (AFO)
- 殘肢管理和義肢維護

Common terminology in Healthcare & Rehabilitation

醫療保健與康復的常用術語

Medical Problems

醫療問題

related to medical problem

- e.g. shortness of breath
- e.g. sputum retention
- e.g. decrease renal functions
- e.g. high H'stix level (blood glucose)
- e.g. high / low blood pressure

與醫療問題有關

- 例如呼吸急促
- 例如痰液滯留
- 例如腎功能下降
- 例如高 H'stix 水平 (血糖)
- 例如高血壓 / 低血壓

Physical Problems

身體問題

related to physical conditions & functions

- e.g. decrease muscle strength of bilateral lower limb
- e.g. decrease active range of motion at left shoulder
- e.g. fair walking stability & tolerance – 1 mild assistant for walking with frame

與身體狀況和功能有關

- 例如雙側下肢肌肉力量下降
- 例如減少左肩的關節主動活動幅度
- 例如一般行走的穩定性和耐受性 – 需1人協助下使用助行架步行

Body functions and structure level

身體功能及結構層面

Absence of / significant difference in a person's body structure or functions

- related to physical problems
- E.g. pain at low back, muscles wasting at both lower limb, swelling at left knee
- E.g. decrease range of motion at right shoulder
- E.g. decrease muscle strength at right hip abductors

一個人的身體結構或功能缺失 / 顯著轉變

- 與身體問題有關
- 例如腰部疼痛、雙下肢肌肉萎縮、左膝腫脹
- 例如減少右肩的活動範圍
- 例如降低右髖外展肌的肌肉力量

Activity level

活動功能層面

Difficulty related to functions/ daily activities

- E.g. decrease ability / independence in walking upstairs & downstairs
- E.g. decrease ability / independence in sit to stand
- E.g. decrease ability / independence in dressing, bathing, etc.

與功能 / 日常活動相關的困難

- 例如上或下樓梯的能力 / 獨立性下降
- 例如坐立的能力 / 獨立性下降
- 例如穿衣、洗澡等能力 / 獨立性下降

Short-term goals

短期目標

corresponds to body function & structure in ICF (impairment level)

able to improve / manage in relatively shorter period

- e.g. decrease pain at low back
- e.g. decrease swelling at right knee
- e.g. improve active range of motion at left shoulder

對應ICF上的身體功能及結構 (損傷)

能夠在相對較短的時間內改善 / 管理

- 例如減輕腰部疼痛
- 例如減少右膝腫脹
- 例如改善左肩的主動活動範圍

Long-term goals

長期目標

corresponds to activity / participation in ICF
(functional level)

need relatively longer period to achieve

- E.g. independence in dressing/ bathing
- E.g. able to walk with stick independently

對應ICF上的活動及參與 (功能)

需要相對較長時間才能實現

- 例如穿衣 / 洗澡的獨立性
- 例如能夠獨立使用土的行走
